

MITCHELL HUMPHREY

FMS-StreamLine

Your Answer to Workflow Automation

FMS II

FMS-StreamLine, from Mitchell Humphrey, helps your organization to streamline its work processes by eliminating the need to route paper documents for approval and/or printing reports for exceptions. When integrated into the workflow process, FMS-StreamLine allows for various work items to be associated with an approval process and automatically routed to other individuals in your organization. In addition, FMS-StreamLine notifies individuals in the organization when particular events have occurred.

Key work processes that you can automate with FMS-StreamLine include:

- Internal documents (requisitions, checks, etc.) can be routed via an approval plan specific to the organization's needs.
- When customers reach predefined levels of aging, information can be automatically routed to the appropriate credit representative for follow-up.
- Work process events (invoice postings, vendor/customer information changes, collection actions, approvals, etc.) can be set with triggers which provide automatic notifications to selected individuals within the organization.

THE RIGHT SOLUTION FOR YOUR ORGANIZATION

No matter what industry you're in or what function you perform, FMS-StreamLine can have a positive impact on time, money and decision making.

For more detailed information about how FMS-StreamLine can meet your organization's needs both now and in the future, call (800) 237-0028 or e-mail us at sales@mitchellhumphrey.com.
